

Fees Management Portal

(Client-based Web Application for Appletree Infotech Institute)

About Project

Fees Management Portal is a **web-based application** developed as per client requirements.

It is designed to manage:

- Student **Admissions**
- Fee **Installments**
- Automatic **Receipts**
- Separate **Admin and Student Login**
- Extra modules like **Gallery, Feedback & Contact Form**

This project was developed for **Appletree Infotech Institute** to make the fee process **faster, accurate, and transparent**.

Introduction

The **Fees Management Portal** is a web-based software system designed to manage student-related operations in an educational institute.

It helps in handling **student admission, fee collection, installment , and receipt generation** in a digital way.

The system provides two types of logins – **Admin and Student** – to manage tasks separately and effectively.

Extra modules like **Gallery, Feedback, and Contact Form** make this portal more interactive and complete.

Objectives

- To provide a **digital solution** for admission and fee management.
- To track **installment-wise fee payments** (First, Second, Third).
- To generate **instant fee receipts** for students.
- To allow students to **download or print receipts** by themselves.

- To help admins **add admissions, check installments, and manage records.**
- To improve **communication through Feedback and Contact Form.**

Technology Stack

- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Hibernate (Java Framework)
- **Database:** MySQL
- **Server:** Apache Tomcat
- **IDE:** Eclipse

System Architecture

The architecture of the system works as follows:

1. **Admin / Student User** logs in through the portal.
2. Request is processed by the **Web Application (JSP + Hibernate).**
3. Hibernate connects with the **MySQL Database** to fetch or update records.
4. System responds back with required details such as **admission info, installments, receipts, or reports.**

Features

- Student Admission Management.
- Installment-wise Fee Payment.
- Automatic Receipt Generation.
- Two Login Systems: Admin & Student.
- Gallery Module.
- Feedback and Contact Form.
- Reports and Data Backup.
- Secure and User-Friendly Interface.

Proposed System

The proposed **Fees Management Portal** solves all the issues of manual systems:

- Provides **Admission Module** for new student registrations.
- Offers **Installment Management** with receipt generation.
- Admin can **manage admissions, installments, and receipts.**

- Students can **view their fee details and download receipts** anytime.
- Additional modules: **Gallery, Feedback, Contact Form.**
- Secure **login pages for Admin and Students separately**

The image shows a screenshot of a web form titled "Fees Management Portal". The form is enclosed in a light blue border and contains several input fields and a button. The fields are labeled as follows:

- Course Name**: A text input field.
- Total Fees**: A text input field.
- Installment**: A text input field.
- Deposite Fess**: A text input field.
- Deposite Fess Date**: A date input field with a placeholder "dd-mm-yyyy".
- Remaining Fess**: A text input field.

At the bottom of the form, there is a button labeled "Print".

Conclusion

The **Fees Management Portal** is a complete solution for digital admission and fee management.

It increases **efficiency, reduces manual work, and provides transparency**. Students can easily download receipts, and admins can track all fee-related details.

This project is developed as per **client requirements for Appletree Infotech Institute**.
